

## **Internet Information**

Dale Willenborg was the speaker at the Optimist Club. He discussed map and housing information available on the Internet. They include Google.com, maps.google.com, the new street view maps in maps.google.com (which lets you see views as if driving down the street), maps.live.com (Microsoft's maps), pottco.org (where you can find taxable property values), and realestate.com (which shows the population for a town, average temperature, and average rainfall.)
